

PROJECTS

Leonardo da Vinci:

The participants of the project were ZSŁ and Shrewsbury College vocational subjects teachers who specialize in creating Moodle courses. The teachers had a chance to exchange their experience as far as the use of Moodle platform is concerned.

Aims of the project:

- Getting to know all the possibilities of using Moodle platform in teaching process.
- Getting to know the methodology of distance learning.
- Getting to know the products – ready made courses prepared by Shrewsbury College teachers.
- Preparing and carrying out courses for ZSŁ students.

KAPITAŁ LUDZKI 9.2. EFS

Operational Programme Human Resources 9.2. The development of vocational teaching quality in ZSŁ.

The overall aim of the project is to implement complex programmes to raise the quality of teaching in ZSŁ. The programme is directed at IT and Telecommunication technicians and the fitter of network and IT devices. What's more the programme is to adapt educational offer to the needs of labour market in cooperation with – ELTEL Networks S.A. employer.

Human Resource 9.3. EFS

Blended learning used to teach Telecommunication technicians students in ZSŁ in the scope of 9.3. programme. Popularizing formal teaching of further education in school based on Operational Human Resources Programme 2007 – 2013

Time for professionals

The overall aim of the project is to improve the quality of teaching students of Poznań vocational schools. EFS Projects.

Implementation of the project – 01.11.2009 – 01.08.2011

COMENIUS

Comenius – one of the four sector programmes „Lifelong learning Programme” supports financially and essentially:

- partner cooperation of European educational institutions
- teachers taking part in professional training courses.
- Preparing young teachers by enabling them to take part in trainings.

OSCYLOTRONIK – VIRTUAL COMPANY

The overall aim of the project is to improve vocational competence and develop crucial skills on the job market for 130 students of ZSŁ by introducing vocational training via virtual company.

Specific aims:

- the development of ICT service skills
- improving students autonomy to deal with the current labour market requirements.
- Increase the access to vocational training.

Edukacja włączeniowa Project on the basis of Vocational School in Technical College in Poznań

Project lasts from 2010 to 2012 and within its assumptions supplementary Secondary School has been created. The students are supported by European Union within EFS Project.

The students with different learning problems are provided with opportunities to learn, graduate from school and achieve an educational success. The students would not be able to achieve all the goals in other schools. Why? Because the teachers of ZSŁ are trained to have an individual approach towards students. What is more, the teachers adjust all the educational requirements to an individual student.

The school offers teaching of two foreign languages and the opportunity to gain skills beyond standard teaching programme such as:

- IT devices service
- Blended learning with the use of Moodle platform
- Interpersonal communication
- Others.
